THE *DRAGON RIDER* PHILOSOPHY

Exclusively Available in Europe through B2X

Welcome to Dragon Rider, specialists in motorcycle and extreme sports apparel. At Dragon Rider, we pride ourselves as professionals in all that we do and believe in listening to customers, retailers and distributors to create a product distinctly different, fashion conscious and visually dynamic.

Dragon Rider success speaks to bold designs, strong branding and high quality materials, backed by outstanding workmanship of products.

Dragon Rider products focus on safety, comfort and design elegance, enabling the brand to grow in all markets around the world.

DRAGON RIDER SAFETY AND QUALITY

Dragon Rider products focus on safety and comfort. Each product is designed and tested to meet the needs of the cyclists combining the best possible riding comfort, utilizing the latest material technologies.

Each product undergoes thorough safety and design inspections, utilizing advanced “smart fabrics” featuring:

- Breathable, Waterproof and Flexible Fabrications
- Ergonomic Design to Maximize Mobility
- Reflective Design to Meet Safety Requirements
- Thermal Stability to Maximize Comfort
- Durability

DRAGON RIDER SAFETY AND QUALITY

DRAGONRIDER LEATHER SUIT

premium brazilian cow leather was used to ensure the soft touching of the garments, Plus many safety features to protect you well.

- 1 1.2-1.4mm premium full-grain leather for excellent abrasion resistance. Key area reinforced by double layer of leather.
- 2 Leather flex zones on waist, side and knee for superior comfort and complete bi-directional flexibility.
- 3 CE certified GP protectors on the elbow, knee and shoulder
- 4 Multiple stitched main-seam construction for maximum tear resistance.
- 5 Removable mesh lining.
- 6 Perforated leather panels for increased cooling.
- 7 Foam padding on the arm, back and chest absorbs shocks
- 8 Titanium protection plates are installed on shoulder, elbow and knee to offer higher anti-impact function
- 9 Aerodynamic back hump.
- 10 Ergonomically placed stretch Kevlar® panels for optimal fit and comfort.
- 11 Replaceable PU GP knee sliders.

TECHNIQUE **ICON**

Titanium protectors are installed to increase the anti-impact feature.

The outer shell of the garments is processed with waterproof finishing.

Dragonrider protectors are tested by SGS and pass the CE EN-1621 safety standard.

Dragonrider uses three seems safety stitching workmanship to maximum the tear resistance.

SCHOELLER Keprotec, the high-tech fabric meets the highest requirements in terms of tearing resistance and durability and offers maximum protection.

Dragonrider uses premium Brazilian cow leather with 1.1-1.4mm thickness. The premium leather is highly abrasion resistant and breathable.

Dupont COOLMAX is a four channel polyester fiber that has 20% greater surface area than a classic round fiber. This construction increases the capability of the fabric to draw moisture away from the skin and quickly carry it to outside of the garment.

Products with removable lining help regulate your body's temperature and keep you warm. You can use the garment in warmer weather by taking off the lining.

TECHNIQUE **ICON**

Perforated leather are used to provide air ventilation.

The garment is suitable to use riding racing bikes.

The garment is suitable to use riding street bikes or touring bikes.

The garment is equipped with air ventilation system of fabric.

Reflecting materials are used in Dragonrider products to increase the safety.

Dragonrider garments use stretching fabric or structures in some key area to increase the mobility for riders.

Ballistic is a combination of high tenacity polyester and polyamid. Polyamid yarns provide great abrasion resistance and durability. Combined with polyester yarns they also create technical and visually interesting surface for the fabric.

SMARTEX is a waterproof, breathable membrane developed by Dragonrider to use between the outer shell and the lining of the garment. SMARTEX keeps you dry, the breathability gives excellent comfort, all together giving you perfect climate control management.
